Father Peter detained the servant while he should take a general survey of the premises—repeated the inquiry if this was the room he was to occupy—and at length, appearing to be well satisfied, he disposed of his baggage, and very politicly requested the servant to be good enough to show him down stairs again. And when once more down stairs, after Uncle Peter had taken another careful surwey of the surroundings, the clerk very politically inquired if there was anything further the could do for him.

It is needless to say that Peter Cartwright was the lion of that week at the Astor, and that it was not further required of him to climb up that endless series of stairways—but when his friends called again to inquire for, or call upon him, they found him sougly ensecosed in one of the most eligible rooms in the house.

The globs, is the respectivenes of a sheemed larger in the system, locked by the polescous unions of vigorable decay. This schilation is produced by the action of what heat on what and, and rises with the watery super from it. While the sum is below the borison this voper import mean the earth's surface, and the virus is about with its from the surface, and the virus is about with its from the the internal surface, and the virus is about with its from the best of the from the best of the country of the surface of the country that it is an extended organized in the body. The live becomes berget and safes to server not only this virus, but also the bile from the blood. Both the virus and the bile recursiance in the circulation, and produce violent constitutional disorder. The spicen, the hidneys, and the stomach sympathies with the birner, and become disordered him. Thaily, the instinct of our organized, as if in an attempt to expel the noxious inpusion, concentrates the whole blood of the lood in the internal excretories to force them to case it mit. The blood leaves the surface, and rashes to the control organs must congressive violence. This is the Citata. But is this effort I falle. Then the Favent follows, in which the blood leaves the custal organs and railies to the surface, as if in another effort to expel the limitating noisen the attempt exhausted, and waits for the ricevery of strongth to report the toppins offer all produces protection the best in it is not recover. We have labored to flud, and have found, an endode.

Aver's Ague Cure.

Ayer's Ague Oure.

This manufacts this malarinous retions in the cody. As it should be it we be a first to be a filled to the constitution of the cody. As it should be it will be a filled to this afflictive disorder with perfort entrainty. And it does more, or rather does what it of more service to those subject to this infection. If taken in season it expels it from the system as it is disorded, and thus keeps those who use it free from its attacks; keeps the system in bealth although exposed to the disease. Consequently it nuturally curse, but protects from the great variety of affections which are induced by this malignant infinence, such as Remittent Fever, Calli Fever, Dumb, or Masked Arus, Periodical Hesdache, or Bilious Headache, Billous Fevers, Neurolgia, Rheumatism, Gost, Blindness, Toothache, Earniche, Catarri, Asthma, Palpitations, Painful Affectious of the Stomach and Bowels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "Agus Cerae" removes she cause of these derangements, and curse the disease.

This it accomplishes by stimulating the excertories to expel the virus from the system; and these office of their own agreen. Hence arises what we erm accimentation. Time may accomplish the same and, but often life is not long enough, or is ascribed in the attempt, while this "Acus Curse" does it at once, and with safety. We have great reason to believe this is a surer as well as agar tempty for the whole class of disease which are enused by the missmatic infection than any other which has been discovered; and it has still another important advantage to the public, which is, that it is cheap as well as good.
